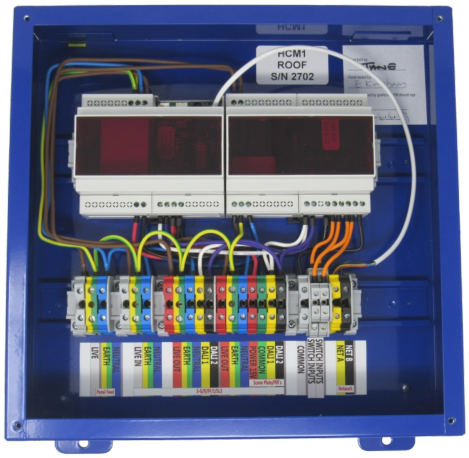
# CUSTOM PANELS

In our production facility we produce bespoke panels to suit individual requirements and installations. These panels facilitate easier installation for the electrical contractors who are able to wire to pre-labelled terminals within the panel as opposed to wiring to individual modules. Terminal Labels are produced by our CAD team based on the drawings supplied.

Our panels can be produced using any third party modules and tailored to any specification. Each panel is individually checked for functionality and operation before it leaves our facility. Our metal enclosures can be produced in any RAL number depending upon individual requirements.

**Part Number:**
**Available on request**

ECOLUX DATASHEET



- Supplied in powder coated metal enclosure up to a size of 2m x 1.5m
- Cable entry through knock outs or slots through any side panel or back panel
- Range of terminal sizes can be fitted from 2mm to 6mm
- Design can include RCBO's, Isolators and MDB's
- Range of lid options including Screw, inter lid and otter door with a locking option
- Can be wired for any modules including Lighting Controls, Lutron, Crestron and KMX
