

INSTALLATION GUIDE

MAIN DETAILS

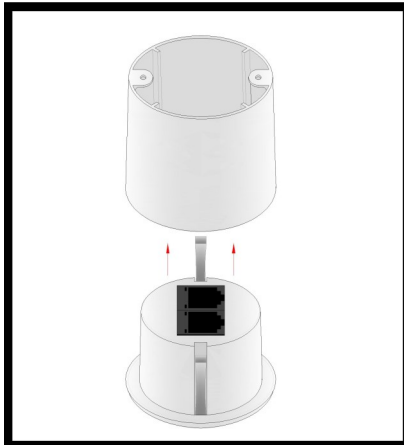

Hole Size

Please ensure the hole cutter is 42mm. If the PIR is forced into the ceiling it can be damaged and become difficult to remove.

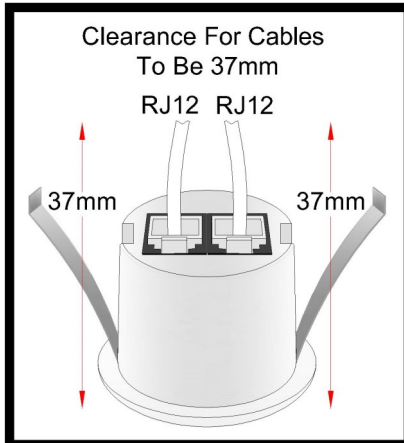

Surface Mounting

For installation we can supply a surface mounting tube (product code: LC-PIRBB).

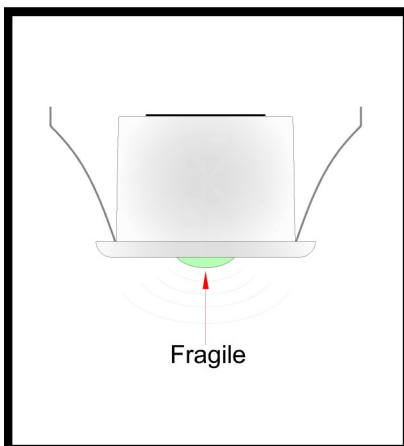

Required Clearance

The PIR will need 37mm clearance for the connections, to ensure the cables don't get damaged or flattened.

Precaution

Care should be taken not to press on the lens during installation, to avoid damaging the PIR.

PRODUCT TYPE:

Presence Detector

PRODUCT CODE:

LC-CANPIR2

FOR DATASHEETS:

www.lightingcontrols.ltd.uk

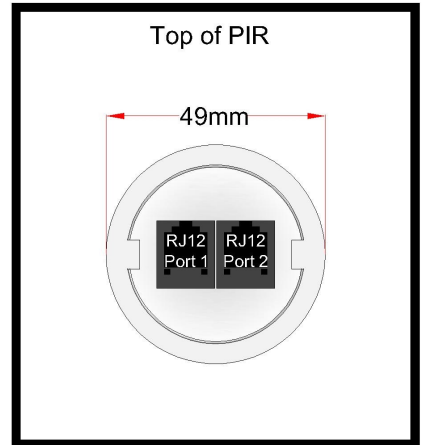

CONNECTING THE PIR

Connection

RJ12 Plug-and-play

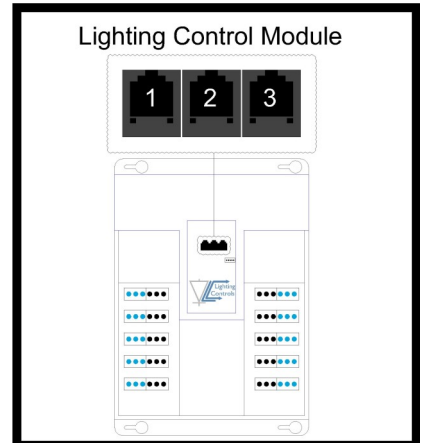

- 3 per LCM
- 2 per PIR

Maximum amount per LCM

A maximum of 10 PIRs can be daisy-chained to a single LCM.

Note: the number of PIRs will be reduced if other devices (i.e. Scene Plates) are connected to the same string.

Daisy-chaining
